IATE administration

The IATE web site is administered by the Translation Centre for the Bodies of the European Union in Luxembourg on behalf of the project partners.

Background

In 1999, the EU institutions decided to develop a brand new database merging the content of all their terminology databases in order to enhance interinstitutional cooperation, taking advantage of new technologies.

In 2004, IATE was launched for internal use in the European institutions.

In June 2007, IATE was made available to the general public.

The EU's multilingual term base

In IATE you can find EU-specific terminology and jargon, as well as terms from all sorts of areas, such as law, agriculture, information technology and many others.

It brings together all the information previously included in the European institutions' former terminology databases, such as:

- EURODICAUTOM (Commission)
- EUTERPE (Parliament)
- TIS (Council)

IATE has 8.4 million terms, including approximately 540 000 abbreviations and 130 000 phrases, and covers all 23 official EU languages.

New terms are added every day and the contents are constantly updated.

IATE plays a major role in ensuring the quality of the written communication of the EU institutions and bodies.
